

Welcome to the Seven Historical Suites

**“ A contemporary Wunderkammer:
this is the soul of Seven Historical Suites.
Because a place, to be really special,
must have one. ”**

Inspired by the Sicilian rooms "Stanze delle Meraviglie", where princes and viceroy collected rare and curious objects with dedication, Seven Historical Suites is a refined, comfortable, luxurious environment: the ideal place for the contemporary traveler who makes beauty a value, not only aesthetic. Seven is a project as meticulous as full of human and infinite love, aimed at offering guests a unique and unforgettable experience. Seven suites located in the heart of Trieste.

Journey through time

**“ The monumental spaces of Palazzo Terni
invite you to make a journey through time.”**

There is a specific reason why the suites of Seven can be defined historical: the building that houses them is an artistic and cultural asset of considerable value. Built in 1884 by the will of Marco Terni, who made it the headquarters of his company and elected it to his private residence, the building can be considered as a precious testimony of the Trieste of the time. Palazzo Terni is located in the heart of the eighteenth-century Borgo Teresiano, wanted by Maria Theresa of Austria to give impetus to the impetuous development of the city, as the main port of the Habsburg empire.

The richness of the interior decorations, the quality of the materials and the refinement of the decorations blend with the neoclassical architecture and give this stately palace a final result of great impact. Wood, polychrome marble, stone, wrought iron. Then columns, tempera and a profusion of ornamental materials, winged figures and plant motifs. The monumental spaces are a sight for the eyes and for the heart and invite to make a journey through time, bringing the visitor back to the golden age of Trieste.

Every detail is important

“ Each environment is carefully designed,
through a selection of objects chosen in the
best Parisian ateliers.”

Decorations and furnishings that suggest to the guest a sense of “theatricality of beauty” and bring him on a journey through time and emotions. Contemporary handmade furniture is combined with antiques and Louis XVI armchairs. Appliques in salt crystal on a decò model is flanked by monolithic steel lamps. The balusters of the staircase, made of glass, are illuminated by the large 18th century Sicilian chandelier in Spanish paper. Silver trays, crystal glasses, linen sheets Egyptian, goose down pillows: each suite is a place where elegance is aimed at the well-being of the guest.
