

PORCELLANE
DI SARONNO

MPS Porcellane

Since 1987

Since **1987** MPS produces in **Italy** a wide range of porcelain articles (more than 1000 different shapes) for professional and domestic use. MPS is a **dynamic company** that, thanks to an advanced management of production and warehouse, is able to meet the needs of just-in-time and tailor-made supplies.

With a great patrimony of experience and specific know-how, it has made the constant search for **quality** its working method, continuing to evolve in line with market demands in order to be a supplier of excellence.

The continuity of the products in the catalog offers customers the possibility of replenishment over time.

The uniqueness of MPS porcelain products

Passion and experience allow us to be a manufacturer of quality tableware and porcelain items that puts the needs of all professionals in the **Ho.Re.Ca.** sector first.

And this is precisely what makes all the tableware we offer so **special**: an excellent container made with passion and care becomes extraordinary thanks to the touch of the most **visionary** chefs.

Free your creativity

For us, porcelain is not just a material, but a tool that allows us to create bases for your **creativity**, like a frame that embellishes and enhances the beauty and flavors of a **masterpiece**, yours.

Discover all our lines of items, each with a different style and perfect design for every presentation you can deliver: unleash your creativity among shapes, lines, thicknesses and colors in a harmony of taste and class.

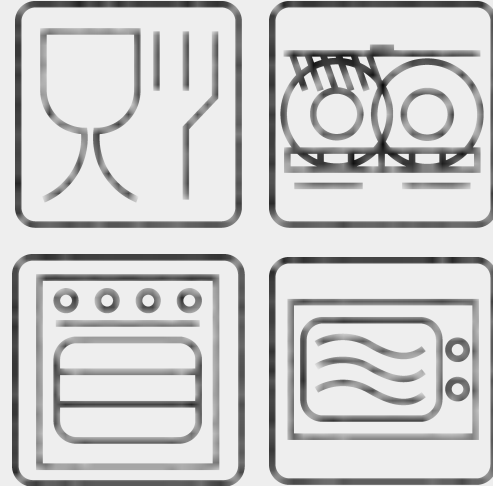

Italian style and passion

Constant dialogue and customization have led us to **synergistic partnerships** with hundreds of clients, including well-known hotel chains, world-class restaurants, and food service giants. Our Made in Italy reaches chefs who seek **perfection, even abroad.**

MPS Porcelain is:

- 05 | Certificated suitable for contact with food by certification institute ICQ
- 06 | One of a kind because each piece is partially handmade and may therefore possess minor imperfections (not to be considered defects)

MPS Porcelain: respect for the environment and elegance

Porcelain is a **high-quality material** known for its strength and, thus, its long life, which reduces scrap and waste. There are three main factors that make porcelain a **sustainable and environmentally friendly** material: versatility, durability and its natural composition.

In addition, MPS Porcellane's production processes have a **low environmental impact**.

White classicism

In addition to **classic and timeless white** porcelain, MPS offers an extensive catalog of products that meet the needs and aesthetics of every professional, in complete product lines and items of all sizes and colors.

The most versatile porcelain

MPS Porcelain creates items that combine the **ancient candor of beauty** of the finest porcelain with the contemporary choices of the most fashionable professional. A mixture of **top-quality** feldspar, quartz, and kaolin originating from the earth, produce items that can be used in the oven, microwave, and dishwasher.

A versatile classic for every style, with products designed for the most discerning chefs.

The warmth of stoneware

Stoneware is composed of a **mixture of natural materials**, not necessarily valuable, and non-white in color due to the presence of impurities in the clay used for preparation, and this differentiates it from feldspathic porcelain.

With all the advantages of the latter, the appearance resembles that of a stone, for presentations with a more rustic character that can convey **warmth and familiarity**.

Opposites of elegance with Ghisa

Two universes collide in the Ghisa line, which combines the strength of the ferrous material, cast iron, with the elegance of the finest porcelain. Pieces made of feldspathic porcelain but with a variegated finish that makes it **unique** and **durable** in the strict matte-black guise for original and striking presentations in the marriage of the sole advantages of two textures that seem to be at the antipodes.

The elegance of nature in Porcellana Ardesia

Slate is a mineral originating from a well-known Ligurian locality, **Cavi di Lavagna**, and its composition gives items made with it a naturally gray, light to dark color.

In a triumph of nature-inspired aesthetics, the **Porcellana Ardesia line** allows chefs to bring all the raw yet elegant style of slate-effect porcelain ware to the table. Porcelain provides non porosity and scratch resistance in products ideal for professional use.

Creative Flow

Forms of pure poetry jealously guard delicacies.

The flow of light on the nest porcelain gives **a touch of ethereal class.**

A sculpture carved from the noblest material, usable for serving every course, the Creative Flow line brings splendour to the table.
