

Intelly Scan

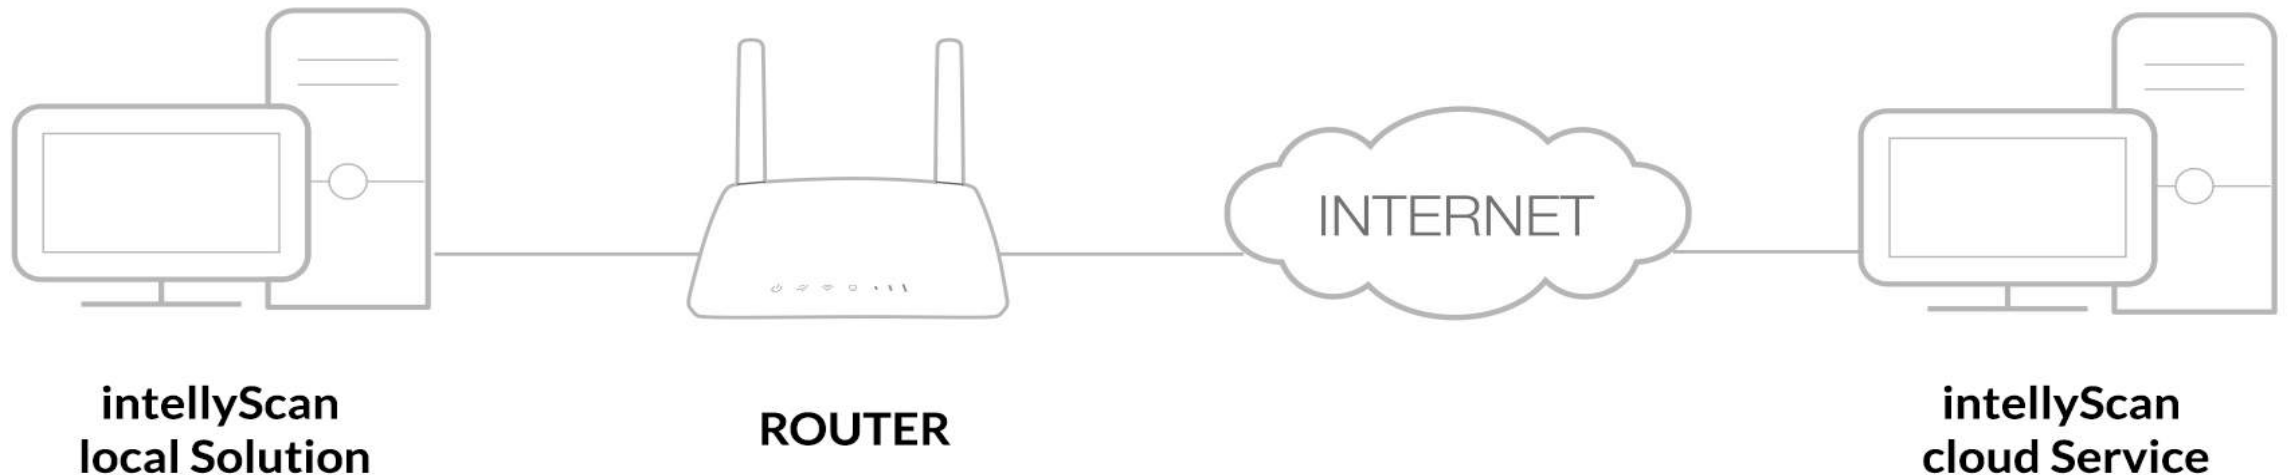

## ACCESS CONTROL FOR BUSINESS

IntellyScan is an access control software that allows you to control and manage the entry, exit and the flow of people inside a room, whether registered or not, through the use of recognition systems such as QR Scan, the use of badges and biometric identification techniques such as face or fingerprint recognition.

In full respect of privacy, IntellyScan offers advanced image and video analysis services in real time by carrying out data processing authorized and granted directly by the user through our IntellyAccess mobile application.

*IntellyScan is a **complete** and **modular** solution managed **locally** and in the **cloud***

# THE APPLICATION SUITE

Mobile application for users and smartphones

**IntellyAccess**  

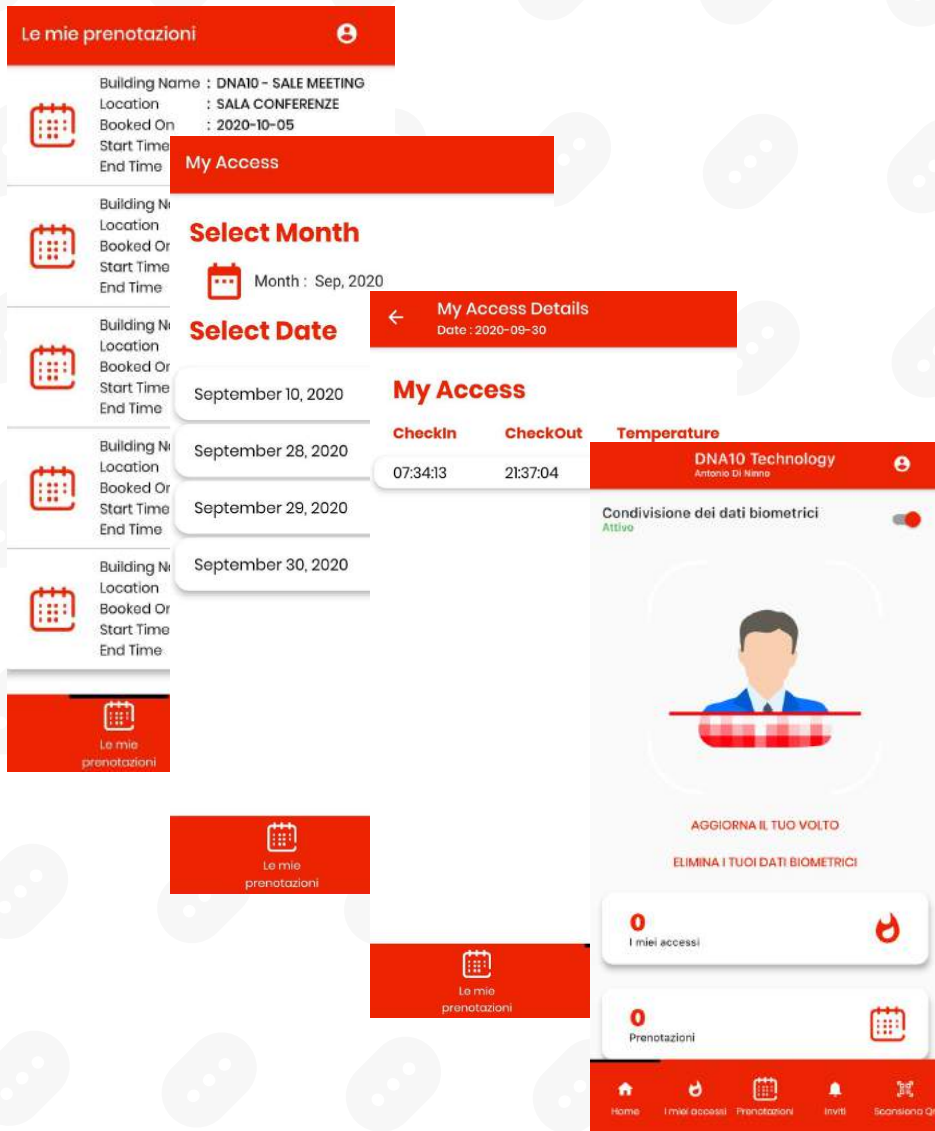

Mobile application for gates and tablets

**IntellyTablet** 

Web application for management

**IntellyWeb** 

# IntellyAccess

is the first mobile app that uses a user-side authorization and consent system for the use and processing of particular biometric data.

IntellyAccess is the tool developed specifically for users to allow the management and explicit authorization to process their particular biometric data at any time and with the utmost simplicity.

By enabling data sharing directly from the application, each user can authorize and grant treatment to the use of their personal biometric data, thus allowing recognition in front of a camera or within the monitored spaces.

# DATA PROCESSING WITH INTELLYACCESS

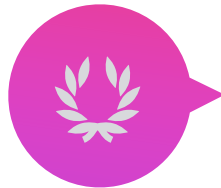

## Sharing

The user decides when to enable the use of their biometric data

## Recording

The user can independently record the biometric data of the face

## Anonymization

The user enters a local password for data encryption

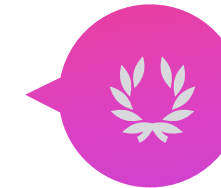

## Protection

The user must confirm the sharing of new data by email

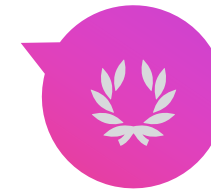

## Retention

The data is disabled and automatically deleted in case of inactivity

## Deletion

The user can decide to delete their data at any time

## HOW DOES IT WORK ACCESS CONTROL

**In front of a camera or an IntellyTablet terminal, the user can carry out identification and recognition operations**

By downloading the IntellyTablet application on an Android device, it will be possible to allow users to identify themselves in front of a tablet using one of the available identification methods. It will thus be possible to allow registered users to carry out recognition by registering entry and exit within a room.

# AVAILABLE ACCESS MODES

## APPLICATION

Use the IntellyAccess application to frame the QR code displayed on IntellyTablet

## BADGE

Register a badge with a tablet equipped with NFC and bring the card close to the reader

## FINGERPRINT

Record a fingerprint with a tablet equipped with a fingerprint reader and place your finger on the reader

# FACIAL RECOGNITION

In front of a camera you can use your face to identify yourself

 **REAL TIME**

We identify people's faces in front of a camera in real time

 **FALSE POSITIVE**

We promptly handle any incorrect recognition results

 **CHECKS**

We apply specific controls on identified persons

 **LEARNING**

We use intelligent learning algorithms and machine learning

**IntellyTatlet**  
*so simple you just need  
to show the pictures*

*the details that make  
the difference*

# INTELLYACCESS APPLICATION

## Sharing and registration of personal data

Through the IntellyAccess application you can enable and disable your personal biometric data in real time within the company access control system, simply by recording a small video using the appropriate wizard.

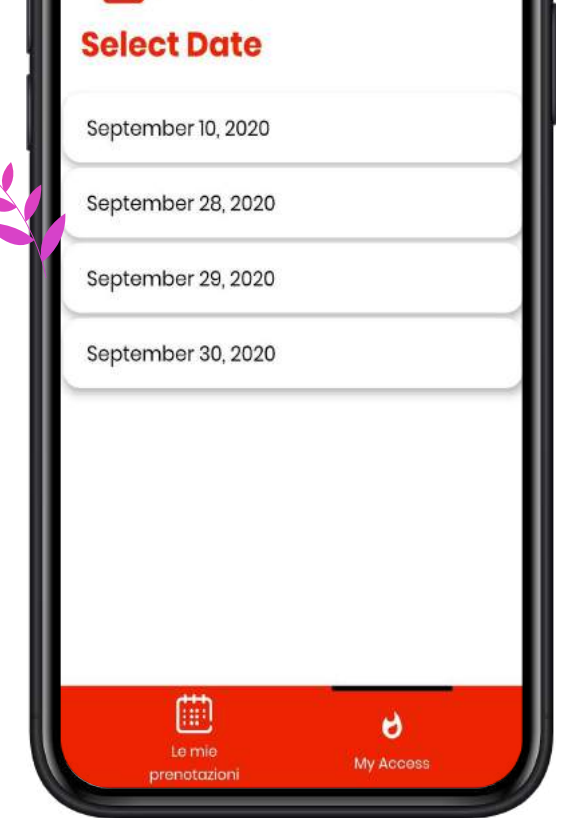

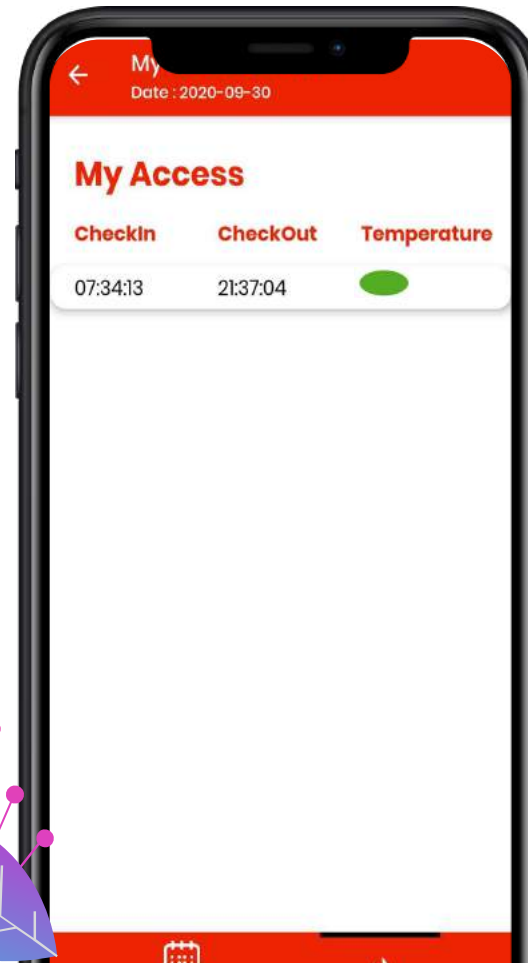

# ACCESS CONTROL & PRESENCE

Always carry your "badge" with you on your smartphone, thanks to the IntellyAccess mobile application you can view your attendance data at any time with access eligibility thanks to the checks carried out

-   **Attendance** Entry and exit times
-   **Eligibility** Outcome of the checks
-   **Archive** Attendance data

# FUNCTIONS OF BOOKING

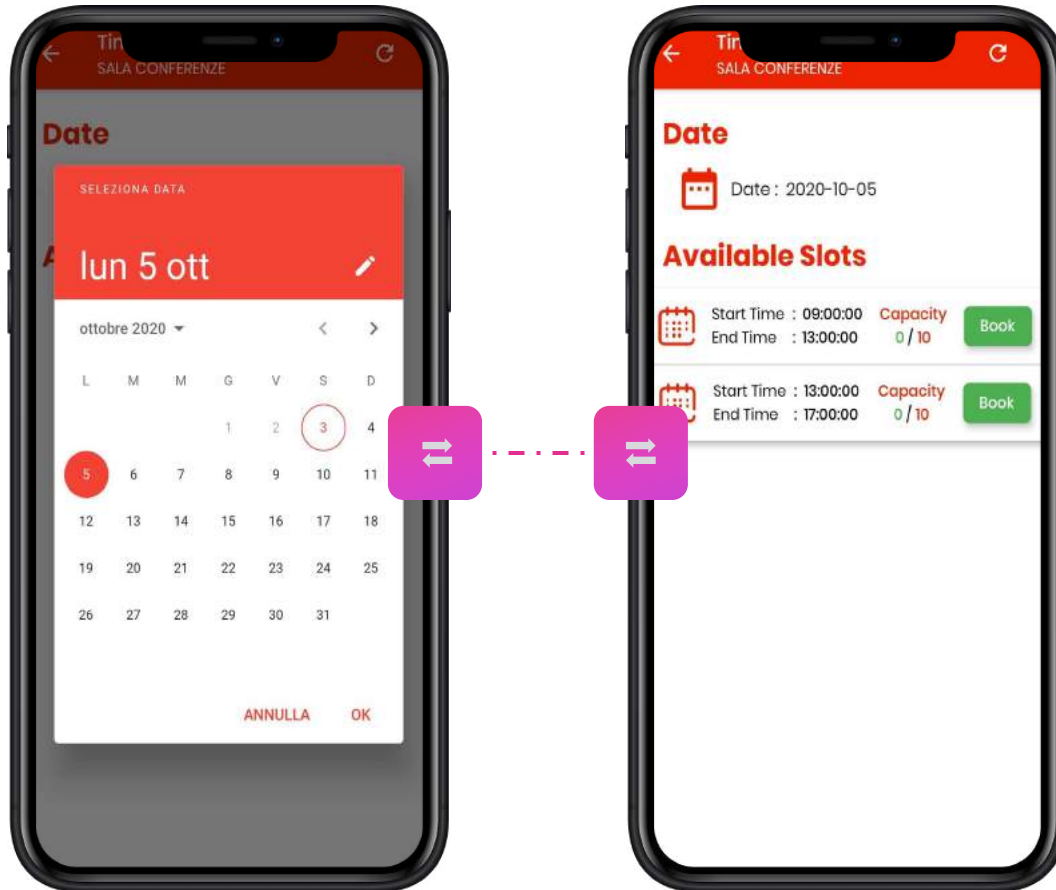

Flexibility necessarily requires technological tools to support daily operations such as the need to book the workstation or have the most appropriate meeting room available.

- **Booking**  
Book workspaces
- **Invitation**  
Invite people to meetings
- **Permits**  
Create booking rules
- **Consultation**  
Consult reservations

# RESERVATION OF ROOMS AND DESKS

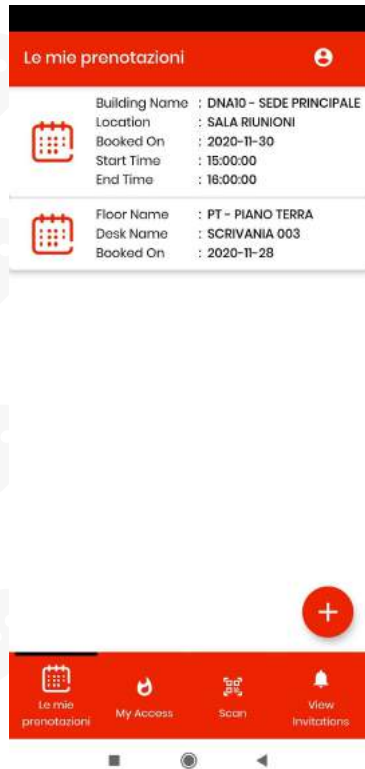

## Everything at your fingertips

The IntellyAccess application also allows you to manage the booking of accesses and the occupation of work spaces such as rooms and desks in a smart way. Thanks to the dedicated service, a user can book, for example, access to the premises, workstations, desks, classrooms and meeting rooms in a simple and intuitive way, thus responding to the organizational and personnel management logics of your company.

# WE INSERT A RESERVATION

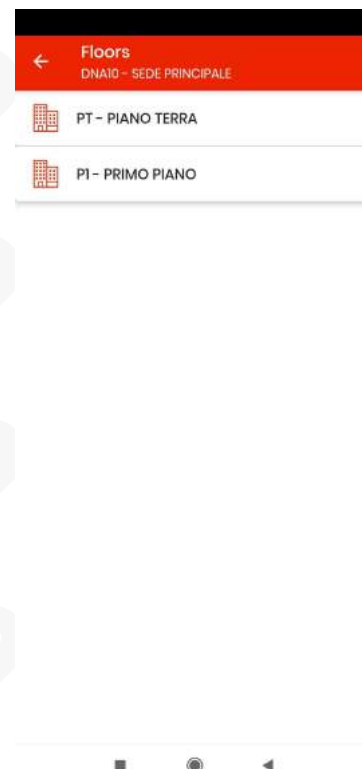

## 1 - Insertion

View reservations  
or insert a new one

## 2 - Building search

View available locations e  
select the building

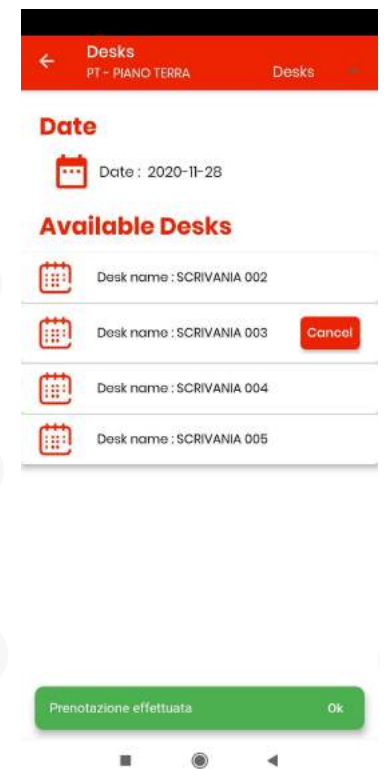

## 3 - Search floor

Do your search  
choosing the plan

## 4 - Choice of typology

Seleziona se devi prenotare  
una scrivania o una location

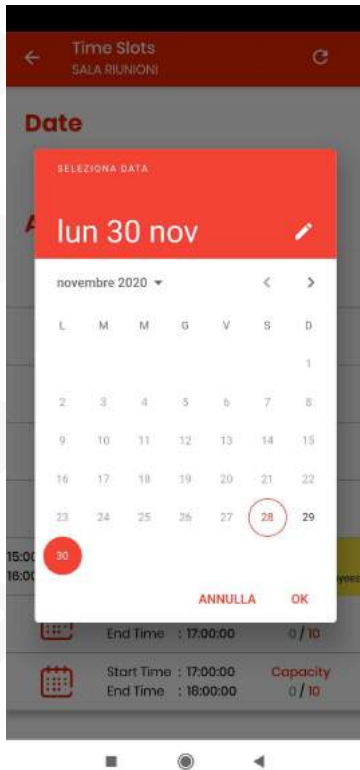

## 5 - Reservation

View availability  
and make your reservation

# ORGANIZE A MEETING

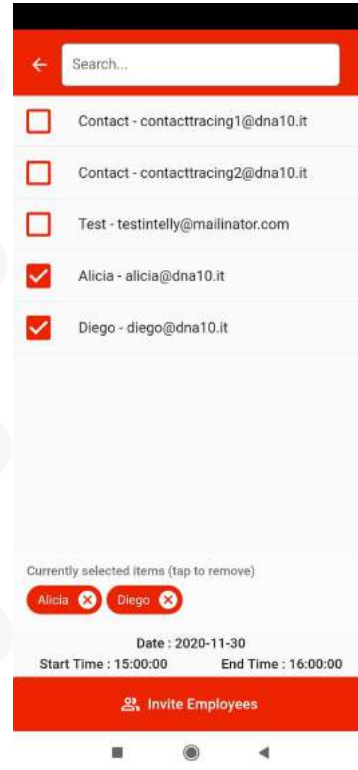

## 1 - Date

Select a date  
to check availability

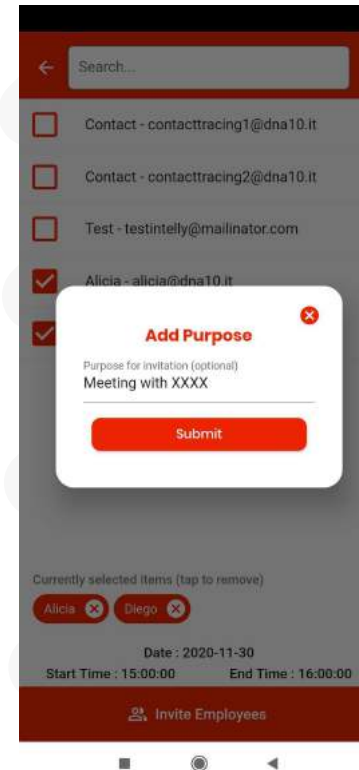

## 2 - Book

Book a time slot  
and invite your colleagues

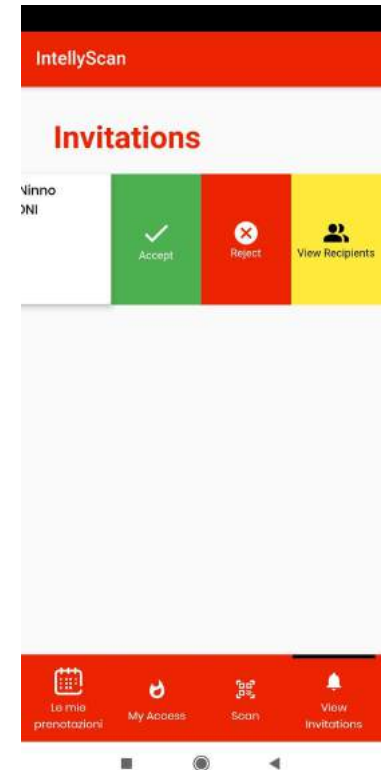

## 3 - Participants

Select Attendees  
among the list of registered users

## 4 - Invite

Proceed with the invitation by  
entering the subject of the meeting

## 4 - Confirmation

Wait for the confirmation of the  
participants

# **Installation**

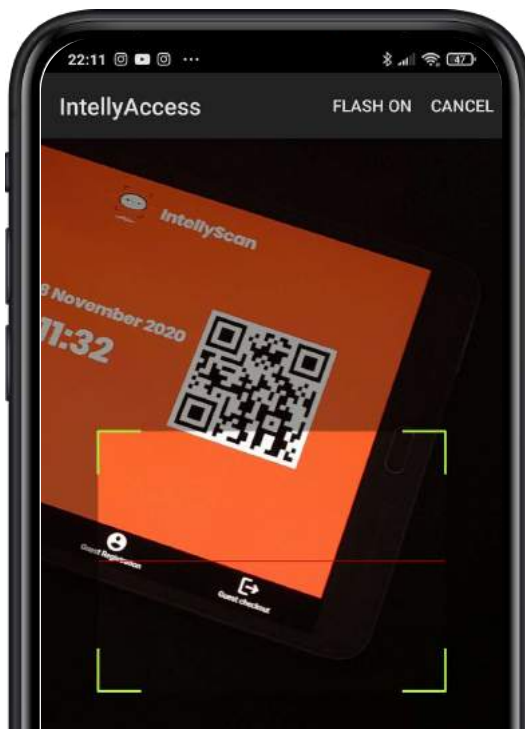

*configuration examples*

# WITH USE OF TABLET & SMARTPHONE

Thanks to the IntellyTablet & IntellyAccess mobile applications it will be possible to quickly configure and install an access control solution for any type of business

Pint on market

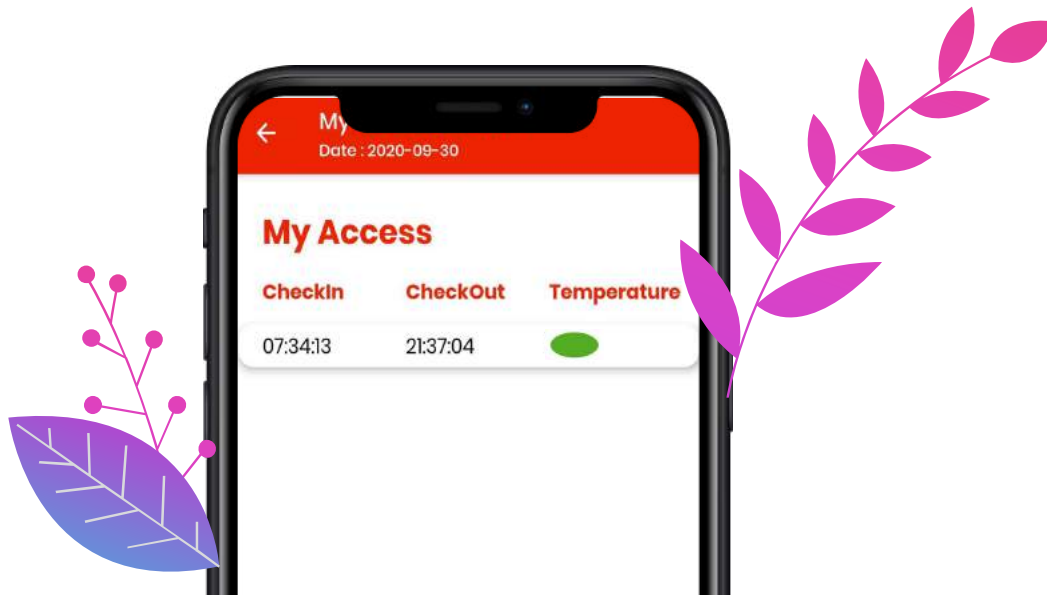

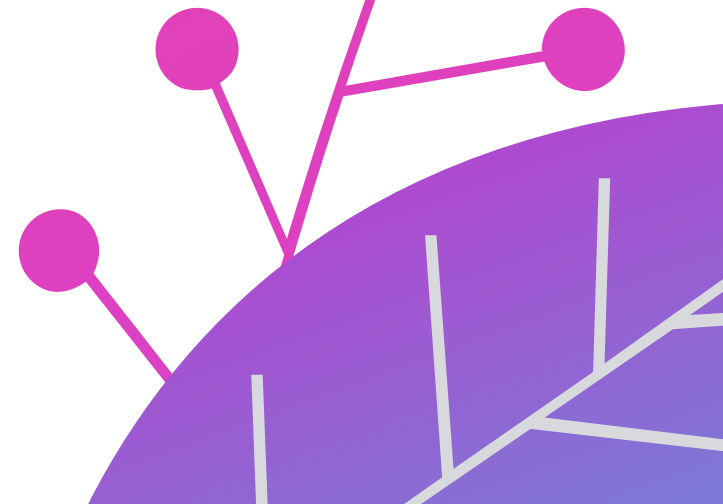

# WITH THE USE OF CAMERAS WITH THE USE OF CAMERAS

Thanks to the use of IP cameras, we are able to identify people in front of a camera by activating, for example, the opening of doors and turnstiles, the switching on of lights and the activation of sounders.

CheckIn	CheckOut	Temperature
07:34:13	21:37:04	

# WITH THERMOGRAPHIC CAMERAS

The intellyScan® solution allows the use of specific thermographic and blackbody cameras \* through which we perform the detection of body temperature, allowing access to specific areas in respect of privacy, an important security measure for the management of shared areas in time by covid-19

## **DETECTION**

fast and effective

Temperature screening in short time and in highly frequented places with people in transit

(\* accuracy up to +/- 0.1 ° C)

## **SOLUTIONS**

safe and contactless

Protection of operator safety thanks to thermal imaging cameras for non-contact temperature measurement

(max distance 6 / 4mt)

## **FLEXIBILITY**

Installation

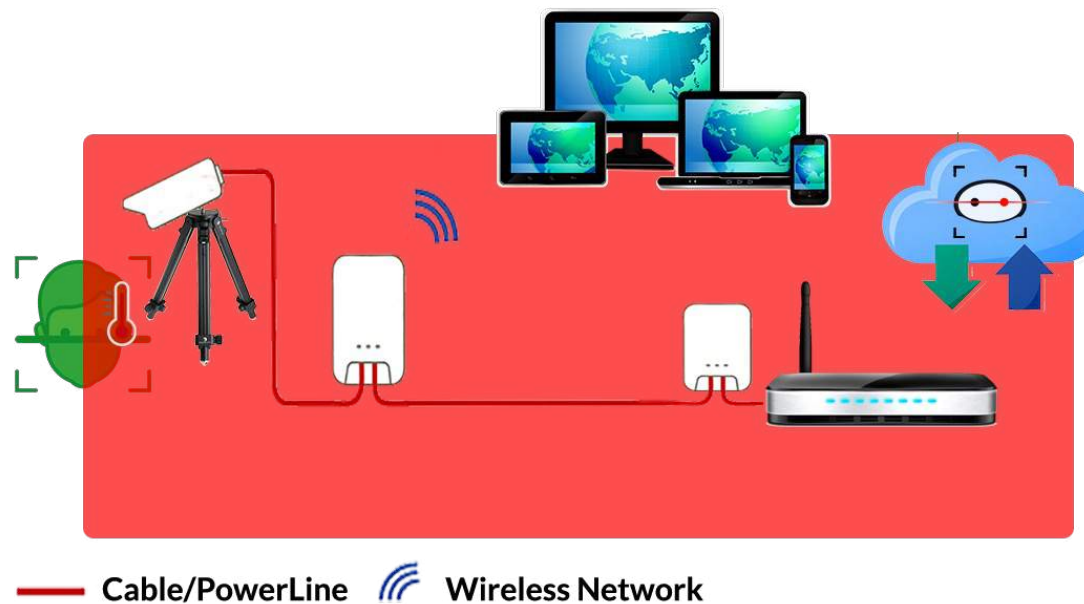

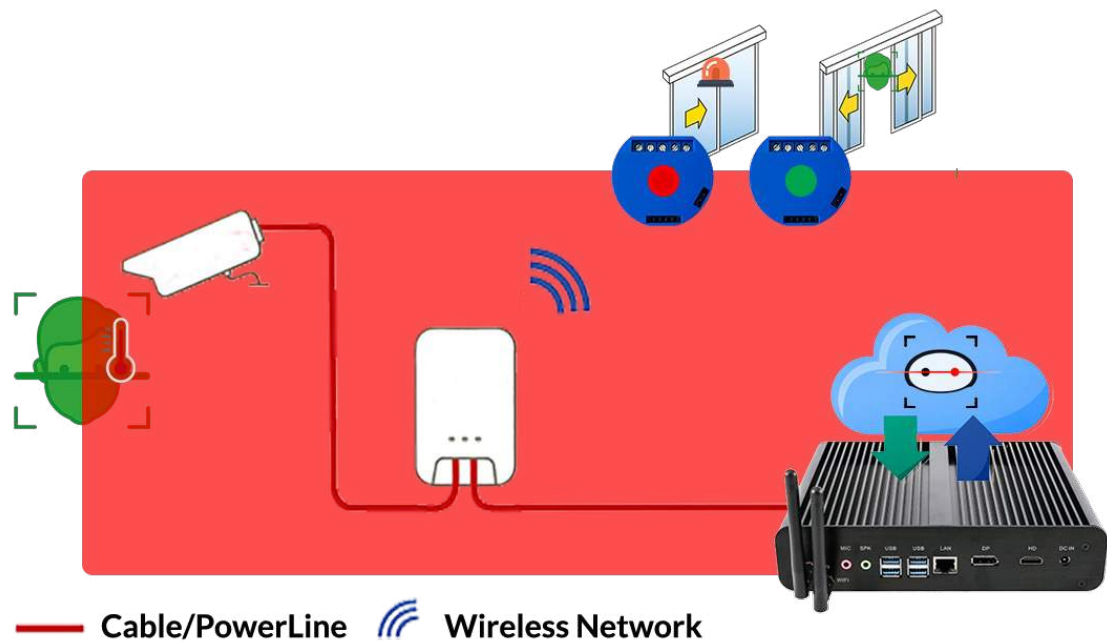

Maximum usability of spaces and adaptability to the normal flow of people

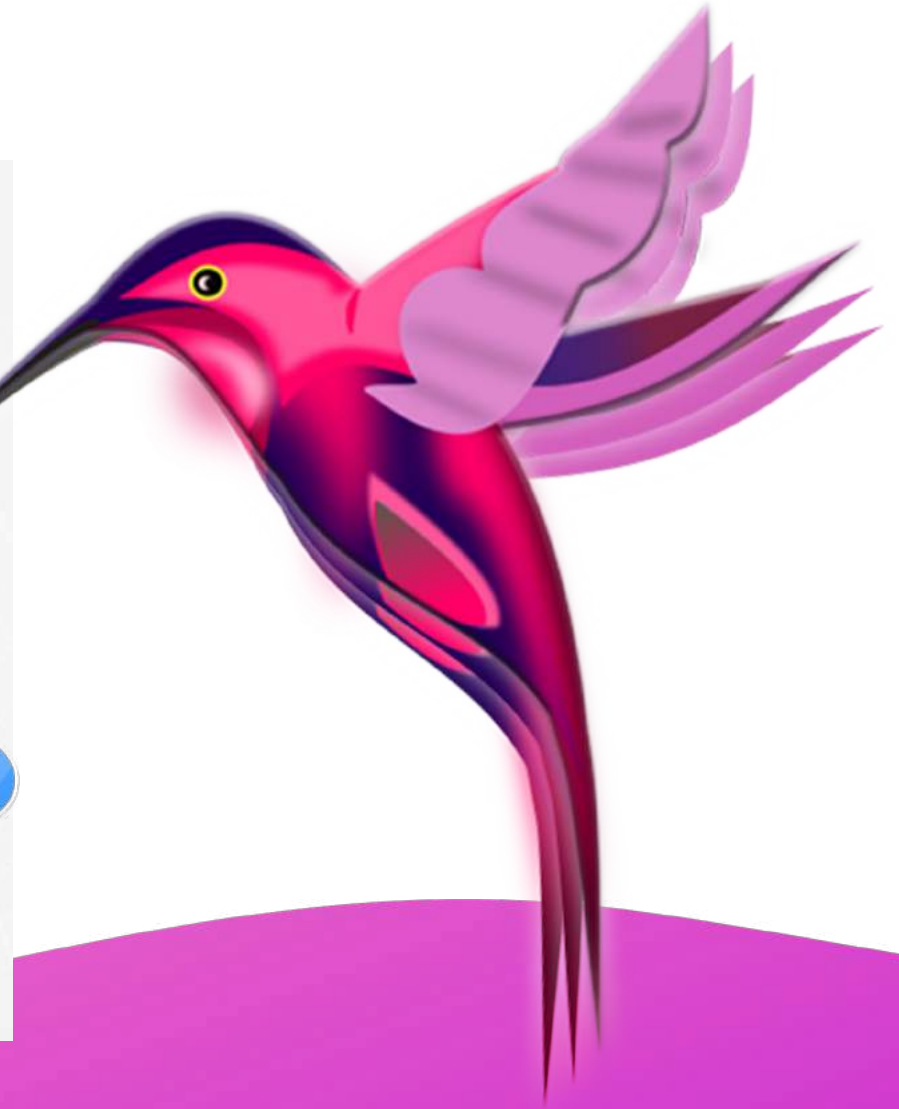

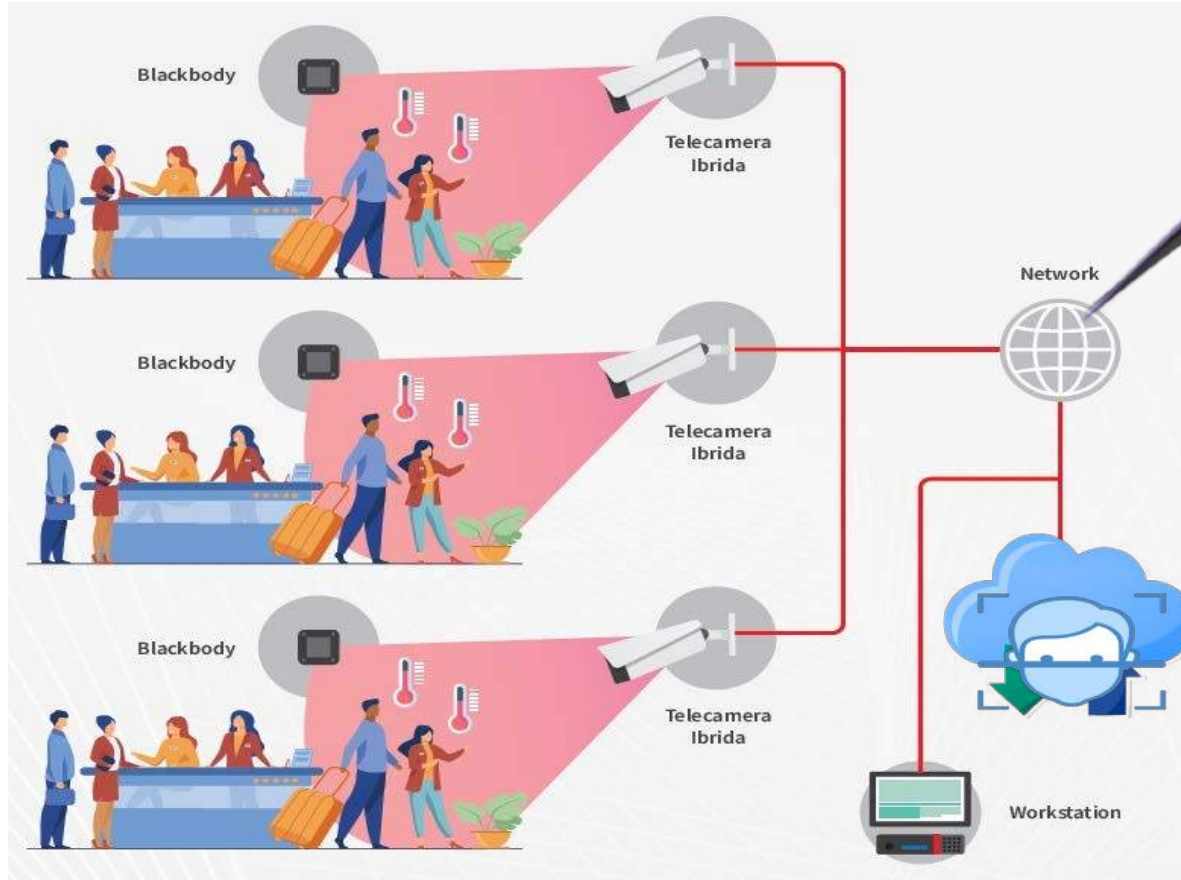

# WITH AUTOMATION

We manage automation by sending MQTT commands to compatible intelligent relays

# WITH CENTRALIZED SYSTEMS

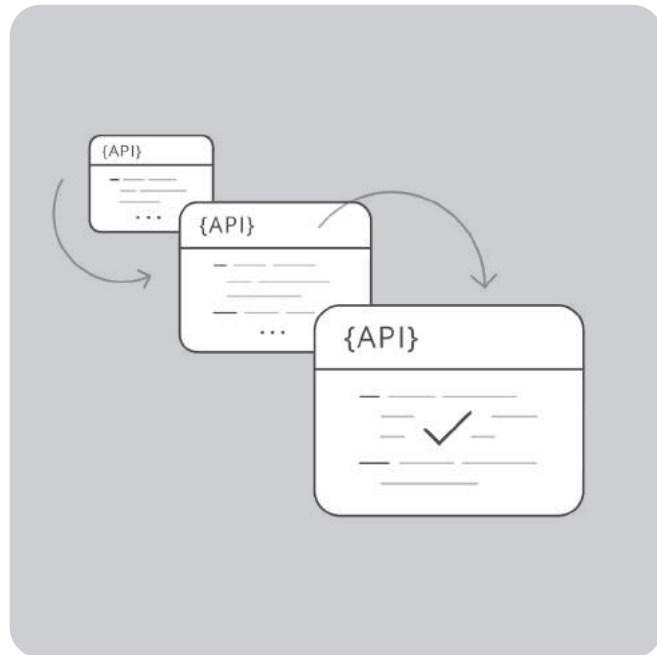

# WITH PERSONALIZED ARTIFICIAL INTELLIGENCE SERVICES

# SOLUTIONS INTEGRATION API

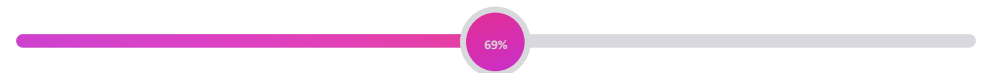

IntellyScan allows you to use our API thus allowing you to easily exchange data with your management software and CRMs.

If necessary, we also offer a product customization service in order to best meet the most varied business needs
