

## AIRLOCKS, SECURITY DOORS AND PARTITIONS...

Creating protective perimeters and preventing intruders from reaching sensitive areas

# A RANGE OF HIGH-PERFORMANCE SECURITY SOLUTIONS

## Certified equipment to protect buildings, staff and visitors

Fichet solutions are designed to offer greater protection to your security perimeters without impairing freedom of movement and site operations. They ensure adequate levels of resistance are in place against various types and levels of risk.

### Why opt for certified products?

Any security equipment delivers passive protection in theory.

Yet when attacks occur, real performance must correspond to the expected level of resistance – even years after the equipment was installed. Certification brings an official guaranty that reality will match expectations and that your investment still delivers protection in accordance with the type and level of risk initially defined. Testing and certification must also apply to fully assembled units – not only parts.

### Specific solutions for all requirements

#### ► High-security doors and partitions

Doors separate non-secure from secure areas. They also provide a physical barrier against specific types of attack—with corresponding levels of resistance to be defined in accordance with your needs.

This comprehensive range of certified modular panels – for windows and partitions but also floors and ceilings – enables you to create secure spaces facing outside or inside—precisely where protection is required.

#### ► Airlocks

Fichet's airlock ranges ensure the implementation of strict procedures for access control. With superior finishes, they also provide high levels of resistance to physical attacks, bullets and explosives.

#### ► Paypoint windows and transfer solutions

Fichet's Hygiaphone transfer solutions allow for visual and verbal contact while cash, packets, documents or other valuables are being transferred from non-secure to secure areas.

#### ► Modular security enclosures

Modular security enclosures (MSEs) enable you to create checkpoint booths as well as secure temporary spaces for bank branches undergoing renovation works. They preserve your corporate image and allow for operational continuity.

# Security and doors partitions

With modular panels and its extensive DorTek range of steel or aluminium security doors, Fichet offers solutions guaranteeing with the highest standards of security and safety to optimize protection from outer perimeters to sensitive or confinement areas.

All models are tested by independent laboratories for their compliance with international standards of resistance to physical attacks (EN 1627-30), ballistic attacks (EN1522), explosives (EN 13123/124-1 and EN 13123/124-2) and fire (EN1634-1 and EN 13501-2).

Depending on your needs, various types of resistance can be combined to reach the adequate level of protection. A wide array of integrated devices are also available to create customized configurations: electric locks, call buttons, mini-cameras, etc.

## Steel doors CityDoor & VulTek+

## Aluminium doors MagTek, DarTek & BlasTek

## Steel security walls CityWall

Our CityWall range of modular panels allows for the creation of any type, size or shape of security enclosure. CityWall solutions are compatible with security doors as well as with most other Fichet products (incl. airlocks and transfer solutions). Their assembly without any welding operation on site guarantees faster installation. Later extensions, reductions or removals do not result in any deterioration of existing buildings.

## Glazed partitions / curtain walls MagTek, DarTek & BlasTek

## Aluminium sliding doors SliSec

# Airlocks

Fichet's airlock solutions combine cutting-edge technologies with superior design. Their elegant frames and extensive glass surfaces blend in with the existing architecture of all sites for which design and finish are priorities. Supporting your corporate image right from the entrance, they facilitate visitor reception and create a welcoming atmosphere while ensuring essential security functions:

- **Filtering access routes** in accordance with the nature of flows while preserving fluid circulation.
- **Detecting unauthorized access attempts** at site entrance as well as between areas.
- **Detecting tail gating attempts** and in/out smuggling of weapons or illicit materials.
- **Preventing intrusions** into sensitive areas by implementing specific access procedures.
- **Protecting staff and visitors** by providing adequate levels of certified resistance.
- **Complying with enforceable regulations** regarding disability access and emergency evacuation.

## SkySas

With unobtrusive design and extensive glazed surfaces, SkySas airlocks blend in with most existing environments. Elegance and transparency combine with high-performance detection (presence, single passage and metallic objects) and very high levels of break-in, ballistic and blast resistance.

CR3 to CR5

FB3 to FB7 / FSG /  
Kalachnikov PS Ball

EPRI to EPR3

## CompacSas

Designed for automated access control, CompacSas airlocks and revolving doors offer the perfect balance between superior flow rates and high security. Their integrated single-passage and metal detection systems discreetly operate to preserve fluid access to secure areas fully protected by high levels of break-in and ballistic resistance.

CR3 to CR4

FB3 to FB6

# Paypoint windows and transfer solutions

Fichet 's **Hygiaphone** brand is acknowledged worldwide for effective solutions enabling secure transfer of cash, documents and other valuables without compromising on clear verbal communication and quality of client/visitor reception.

## Paypoint windows

Paypoint windows enable direct exchanges without intercom between client /visitor and the secure area. Staff remain protected from both pathogens and attacks.

Break-in resistance

Ballistic resistance up to grade BR4NS

## Sliding / transfer trays

Combined with paypoint windows, sliding / transfer trays allow for the exchange of coins, banknotes, tickets and small-size documents between non-secure and secure areas.

Break-in resistance

Ballistic resistance up to grade FB7

Fire resistance up to grade CF60

## Front opening counters

Front opening counters are mainly used for sheltered outdoors installations (entry checkpoints, guard posts, night-time service desks at petrol stations). Coupled with a full duplex intercom system, they protect staff from attacks but also from cold drafts and dust.

Break-in resistance

Ballistic resistance up to grade FB7

Fire resistance up to grade CF90

## Bulk transfer units

Bulk transfer units are built into counters or fitted on facade to allow for secure transfer of larger items (e.g. packets).

Break-in resistance

Ballistic resistance up to grade BR4S

## Intercom systems

Intercom systems can be embedded in the work plan or simply positioned on the desk. These products combine with other solutions to optimize acoustic comfort of exchanges between non-secure and secure areas.

# Modular security enclosures

Smart solutions to ensure continuity of operations, upgrade access security for your sites or offer more services to clients.

## Custom ranges tailored to your needs

Fichet offers armour-plated modules with certified break-in and/or ballistic resistance. Both standard and customized versions can be used to create permanent as well as temporary premises, fully adapted to local requirements, configurations and constraints. For all types of professional sites, Fichet solutions truly answer your organisation's special needs.

### Event / building-site modules

- ▶ Optimizing secure interactions on events.
- ▶ Complying with building-site regulations.

### Temporary office space

- ▶ Ensuring continuity of secure operations during renovation / transformation work.

### Reception desks

- ▶ Managing site-entrance of incoming vehicles, staff and visitors.

### Immigration detention centres

- ▶ Offering secure temporary accommodation.

### Checkpoints

- ▶ Protecting reception staff on sensitive sites.
- ▶ Resisting to break-in attempts, ram-raids and ballistic attacks'.

### Cashpoint kiosks

- ▶ Stand-alone protective enclosures for ATMs to maintain banking presence in rural or urban areas.

# Fichet GROUP AT YOUR service !

## ► Strong commitments...

### Aiming for best quality of after-sale services

Permanent efforts to deliver quality and proximity to clients nurture Fichet's extensive range of services.

## ► Over 200 years of experience...

### Supporting long-term partnerships

As manufacturers, we offer installation, maintenance and repair services for all our products to ensure maximum reliability and durability.

## ► National and international presence

### Offering proximity services

With local presence in France, Belgium and Luxemburg, as well as with its worldwide network of partners, Fichet guarantees reactive client services, always at hand.

## ► Services tailored to your needs
